

Take the heat off your Saab...

with these summer savings.

THE NEW SAAB 900 SERIES: A FAVORITE TOPIC OF AUTOMOTIVE EXPERTS

When you considered purchasing your Saab, you listened to expert opinions and evaluations.

With the introduction of the all-new Saab 900 series, the automotive business will have plenty to say. Here's what the critics are saying about the latest addition to the Saab family.

"Still completely healthy, the company is just over 44 years."
— *Car and Driver*

"Not a word's true."
— *Popular Science*

"Saab engineers have developed an art and a tradition as fine as others."
— *Automobile Magazine*

"Saab picks a right side to take on its sleek new 900 Coupe."
— *Auto Week*

"Saab is now here to stay. In fact, there's more than their average car's reputation, and with the 900, Saab's reputation is now for the future as well as the past."
— *Automobile Magazine*

"Saab 900 — Best New Car in its Class"
— *Kiplinger's Personal Finance Magazine*

"The interior is attractive and reasonably priced, with enough head and leg room for most car or 4-wheel drivers alike."
— *Road & Track*

"A Best Buy in the Sport Sedan category"
— *Consumers Digest*

"It's Saab's 90 lighter technology for the road."
— *Automobile Magazine*

"A 900 for the 90's."
— *Auto Week*

But don't just take their word for it. If you haven't already, test our dealership and see how the new Saab 900 fits for you.

UNDER THE HOOD

Saab Cars USA and your dealer want you to get the most out of your Saab. Here are some simple maintenance tips that can help enhance your Saab's performance and increase your driving pleasure this summer.

1. Breathe Easier Inside Your Saab. Green-lens-coded Saabs (check your owner's manual) are equipped with a ventilation air filter. Because this filter clogs more quickly in the summer than due to increased dirt and moisture, air-recirculation that you have to change regularly. This will maintain the air quality inside your Saab, which is especially important for those drivers and passengers who have allergies or tend to use the air conditioner frequently.

2. Preserve Your Battery. While computers quickly diagnose the state of the car, it's best to have the water level in your Saab's battery. If the level falls too low, it could permanently damage the battery, creating problems in starting your car. This only qualified water is added in the form of distilled and deionized to restore your battery's cells to the appropriate level.

3. Improve Performance With A Clean Fuel Filter. Oil computers change their gasoline blend to match the climate. With a hot weather blend including the petroleum, additional sulfonates can rise to your motor's combustion chamber and which will result in rough idling, a stalled engine or loss of power. To protect the optimal performance of your Saab, have your dealer change your fuel filter regularly at the scheduled intervals.

4. Protect Your Automatic Transmission. Under normal conditions, transmission fluid changes are unnecessary. However, in the summer heat, driving through dense traffic or towing a trailer often leads to elevated fluid viscosity and causes your transmission to slip, resulting in power loss. To protect your automatic transmission, please consult your owner's manual or ask your dealer how often the fluid should be changed.

5. Keep Your Wheels Turning Freely. Hot climates and elevated loads cause the wheels of your Saab. Hot weather and old oil can cause a loss to crack, resulting in the loss of important lubricating grease and the failure of drive shaft universal joints. Ask your Saab dealer to inspect them regularly.

6. Maintain Safe Tire Pressure. Because the hot weather increases the demand on your tires, your tire pressure should be rechecked regularly throughout the summer and checked by a specialist before going on a long trip. This will ensure proper traction, smooth handling and increased safety, especially when negotiating heavy loads. If any ribs or screws are stuck in your tires, be certain that punctures can be repaired if they occur in the tread. Sidewall repairs are not recommended.

SATISFACTION PLEDGE

At Saab, our first priority is your satisfaction. In protection of our commitment to our owners, we proudly stand behind every Saab we make. We've built your Saab to reflect the tradition of quality and responsibility that our name represents.

To uphold the high standards to which your Saab was built, please be sure to use genuine Saab parts and service for all of your maintenance needs.
